

# DOUBLE-DECK PRINTER **CP-D707DW**

A single printer with double the power

**High Speed**

**High resolution**

**High capacity**

SINGLE-DECK PRINTER  
**CP-D70DW** 

High printing levels are achieved with the double deck design

## High Speed

Mitsubishi Electric's CP-D707DW is a dye sublimation double deck printer that has double the power of a standard photo printer producing high speed, high quality and multiformat photographs; making it the perfect choice for professional event photographers and system integrators that require a flexible, high quality solution.

(For example a 4" x 6" print can be produced in as little as 5.9 seconds)

## High resolution

## Clearer and sharper prints

The CP-D707DW/D707DW incorporate newly developed image processing methods, making it possible to reproduce excellent true to life prints. The high resolution used within both printers ensures that smooth edges and clear, sharp, natural images are produced.

## High capacity

## Compact in design & high capacity

The CP-D707DW's double-deck design makes it one of the smallest dye sublimation printers in the market today, which makes it a portable solution that requires minimal installation space. The high loading capacity ensures uninterrupted printing of up to 800 4" x 6" prints.

Size comparison with CP-9810DW (conventional model)

<sup>1</sup>Compared to our company's products. <sup>2</sup>Loaded with two rolls of 10x15cm (4x6") media.

## Supports multiple print sizes

## Ease of Use

The CP-D70DW/D707DW is designed for quick and simple operation and allows for fast media loading.

1. Open front door.

2. Pull out front door and load paper.

3. Slide ink ribbon.

4. Close front door to complete the auto paper loading.

## Energy Savings of 96%\*\*

CP-D707DW is designed with a sleep mode function, which reduces power consumption to less than one watt. In addition, a double-deck structure with a single integrated power supply, provides the functionality of two printers with the power of a single printer.

## Print size combination

A combination of paper sizes set for the upper and lower decks makes it possible to print photographs in a maximum of three different sizes.

### EXAMPLE

Upper: 6" width paper size  
4"x6" and 6"x8/9"\* prints simultaneously.

Lower: 5" width paper size  
5"x7" prints separately.

\*6"x9" available February 2011. \*\*Compared with the standby power of Mitsubishi Electric's conventional printer

DOUBLE-DECK PRINTER  
**CP-D707DW**

Printing time approx. <b>5.9sec</b> (10x15cm/4x6")	Print capacity <b>800prints</b> (10x15cm/4x6")	Power saving	Easy to use

■Part names

**Front panel**

- Paper strip bin
- Alarm indicator
- Paper ribbon indicator
- Power indicator
- Print outlet
- Open button
- Printing unit
- Door

**Rear panel**

- Power switch
- Power socket(AC line)
- Fan cover
- USB terminal
- Securing holes for the cable tie
- Handle for transporting (CP-D707DW)

■Consumable parts

Model	Size	Prints per roll	Rolls per box
CK-D735	89x127mm (3.5x5")	450 prints	2
CK-D746	102x152mm (4x6")	400 prints	2
CK-D757	127x178mm (5x7")	230 prints	2
CK-D768	152x203mm (6x8")	200 prints	2

for a greener tomorrow

Eco Changes is the Mitsubishi Electric Group's environmental statement, and expresses the Group's stance on environmental management. Through a wide range of businesses, we are helping contribute to the realization of a sustainable society.

Mitsubishi have also designed 2 new red printer versions for system integration. The CP-D70DW-S and CP-D707DW-S are compatible with Mitsubishi Kiosk and Click Systems.
